Dear Sir/Madame,

I recognize that there is very little we as citizens can do to stop you from irradiating food. People with much deeper pockets are driving your decisions, not what is good for citizens. But I insist that you prominently and clearly label those foods that you have decided to nuke. As a consumer, I have a right to know what you have done to my food before it reaches me. Make it prominent, easy to read, and please lose the cute little daisy like symbol on something that is so serious.

For what it is worth, I would go hungry to avoid eating food that has been irradiated.
